

Automated, flexible and scalable DAM for end-to-end content management

Unleash the Power of Content Lifecycle Management

Comprehensive Content Management

- **Content Lifecycle:** streamline the entire content journey, from creation and collaboration to optimization and distribution.
- **Centralize Assets:** store, organize, and enrich assets in one place for easy access and reuse.
- **Automate Workflows:** eliminate manual tasks and ensure consistency with intelligent automation.
- **Collaborate Seamlessly:** streamline review, approval, and feedback processes for faster delivery.
- **Manage Projects Efficiently:** control tasks, deadlines, and resources for successful project execution.
- **Deliver Across Channels:** adapt content automatically for optimal multi-channel distribution.
- **Adapt to Your Needs:** configure and customize the solution to meet your specific industry challenges.
- **Scale with Ease:** handle large volumes of content and adapt to your growing business needs.

Project Mapping

Plan, execute, measure,
repeat & apply

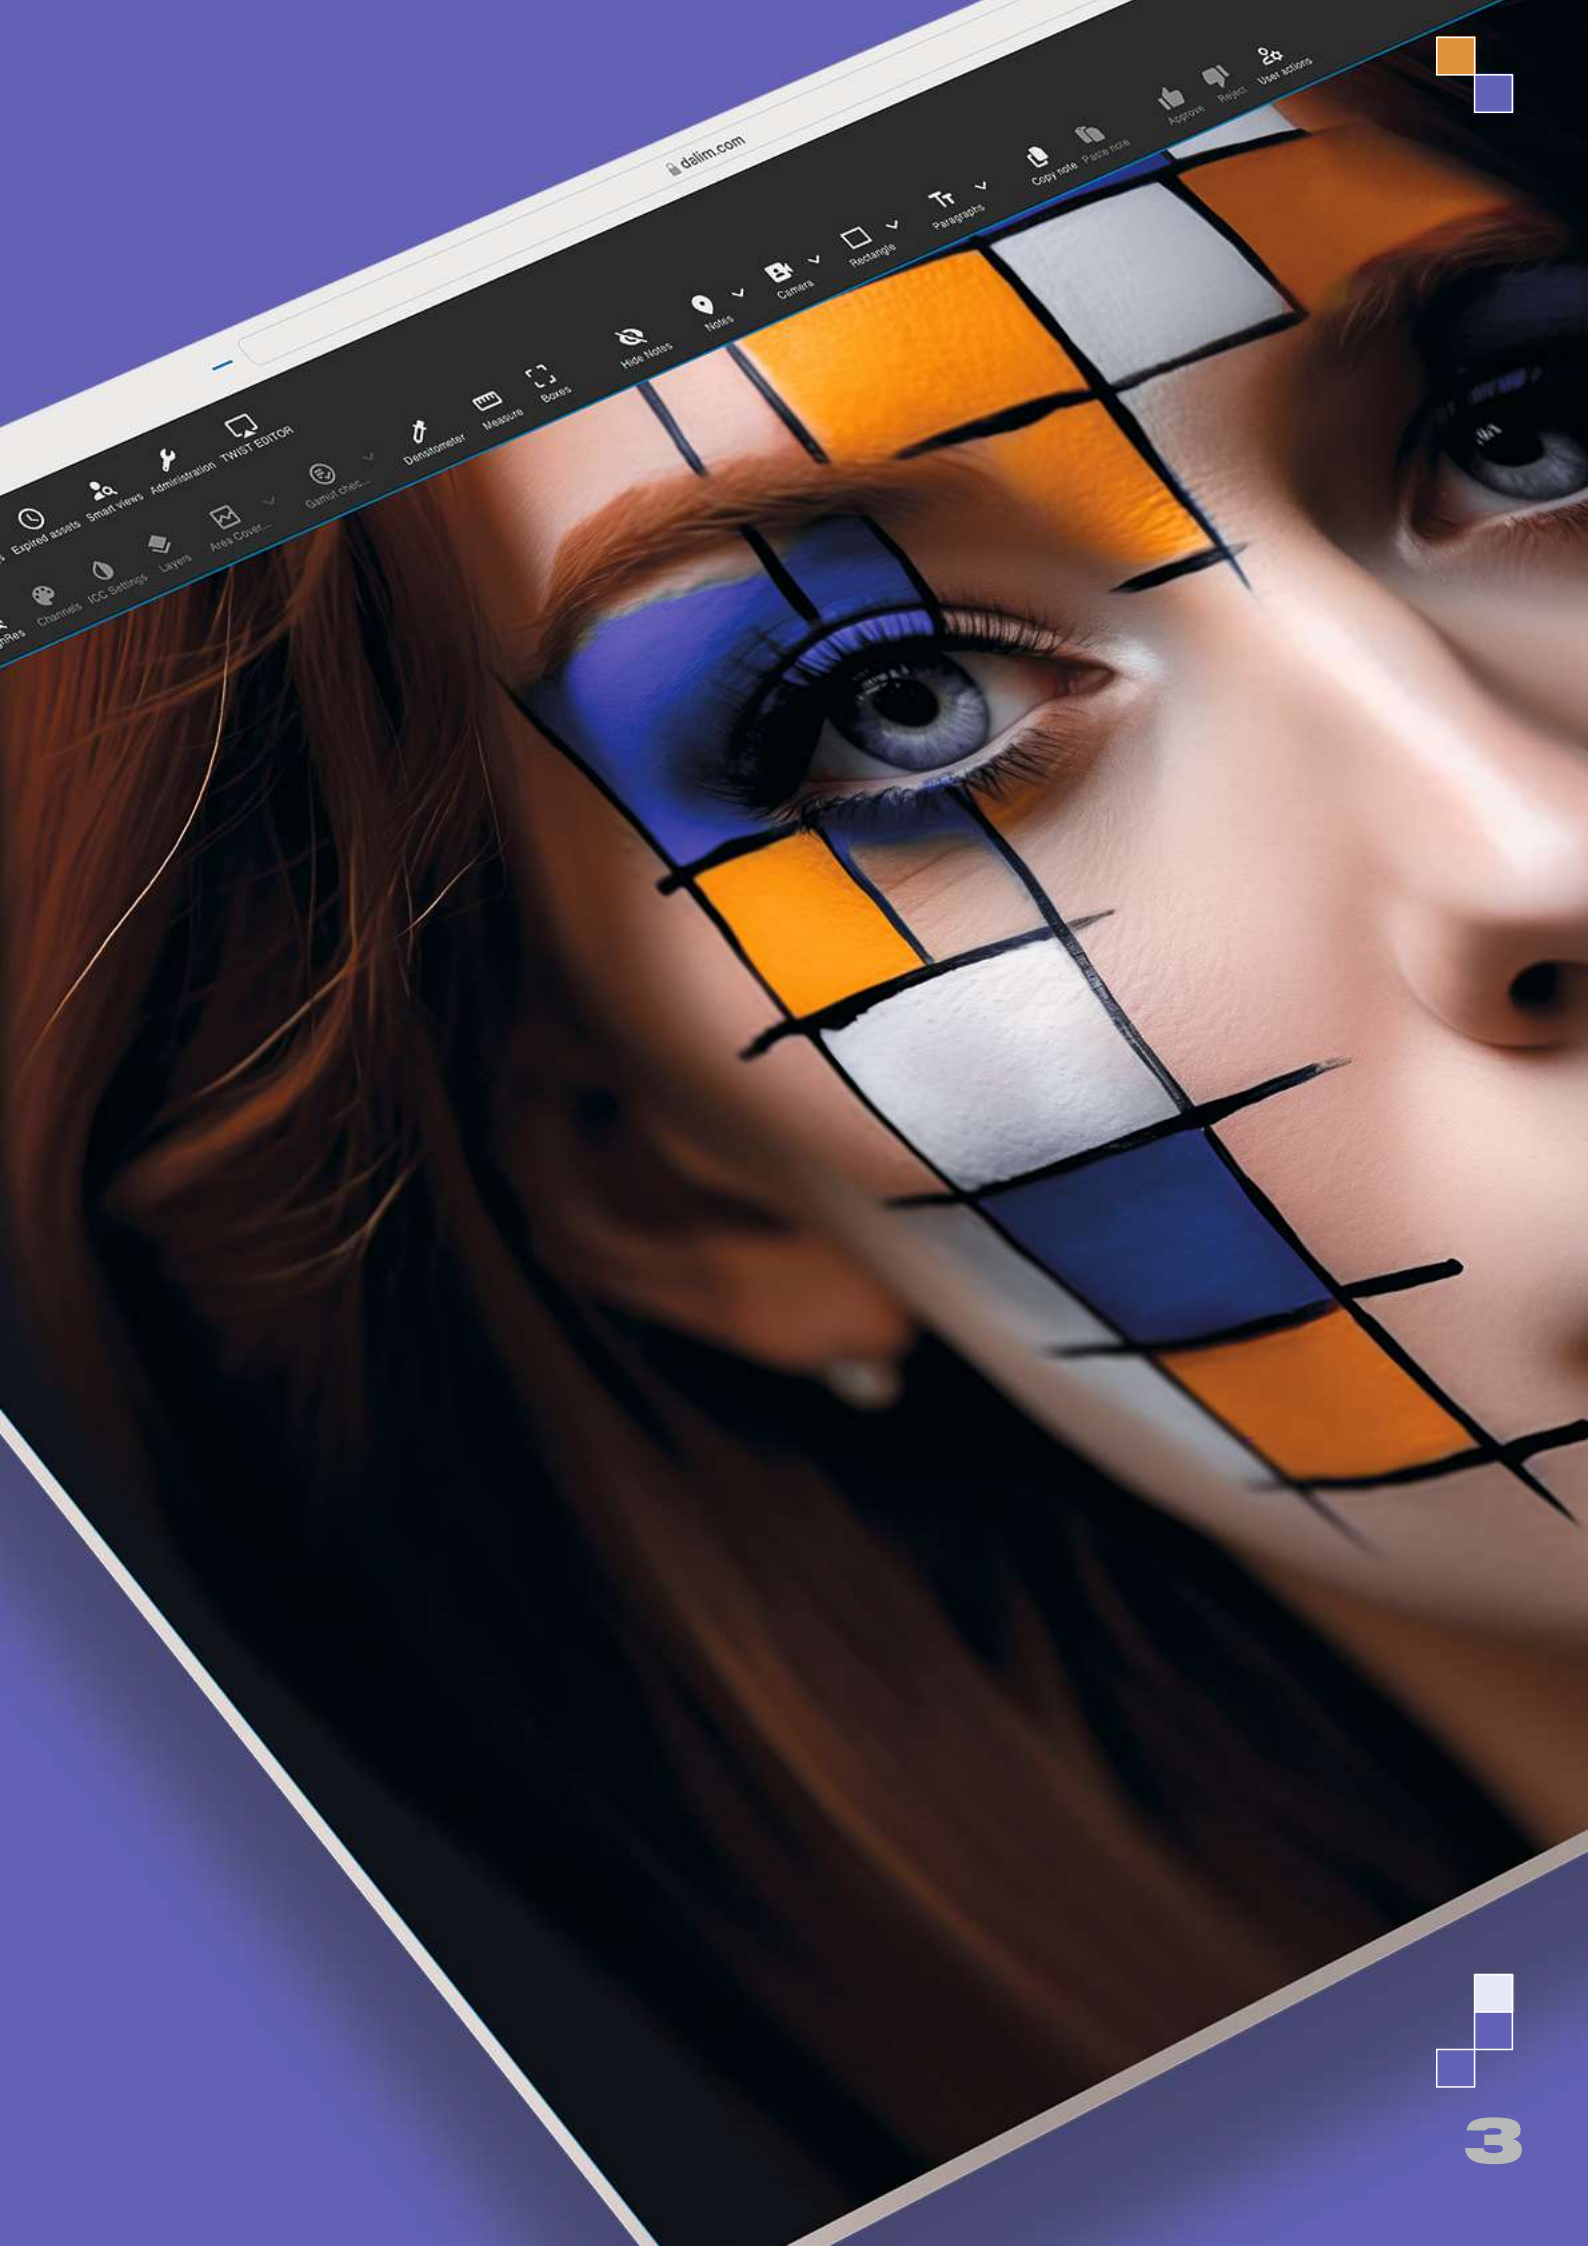

Digital Asset Management

- **Discover Assets Instantly:** find the right assets with powerful search and filtering options.
- **Enrich with Metadata:** capture essential details and drive automation with customizable metadata.
- **Retrieve Past Projects:** access archived projects and assets effortlessly for repurposing.
- **Ensure Brand Consistency:** maintain brand standards with asset versioning and access control.

Project Management & Flat planning

- **Control Projects Robustly:** define tasks, automate assignments, track progress, and meet deadlines.
- **Visualize Print Layout:** interact with flatplans featuring sections, regions, and versioning.
- **Engage with Virtual Books:** create realistic flipbooks for immersive review and approval.
- **Integrate Workflows Seamlessly:** manage workflow stages and deadlines directly within projects.

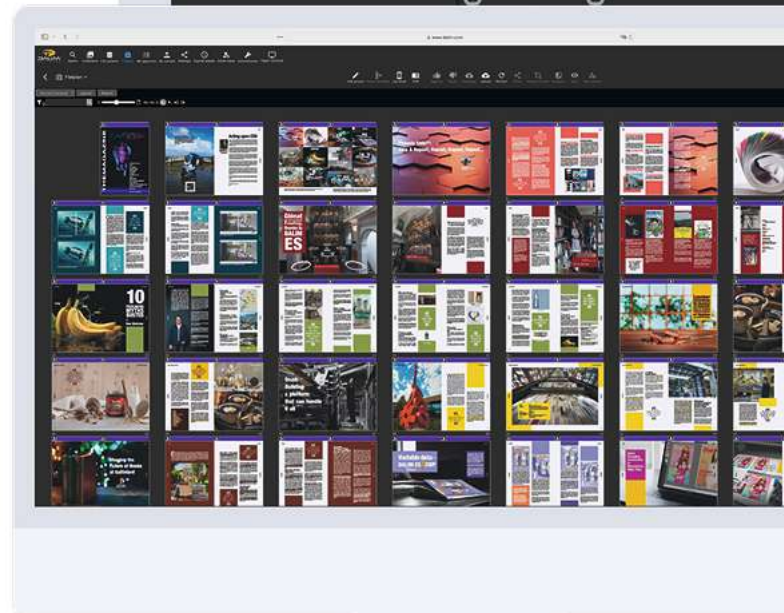

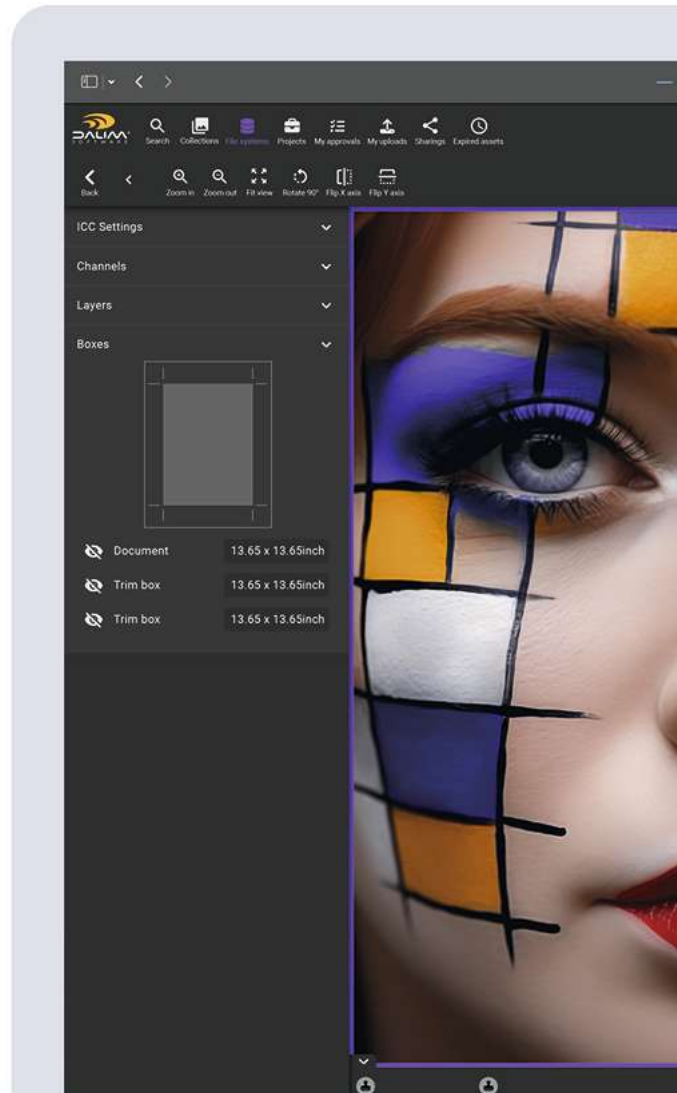

Online Review & Approval

- **Multimodal Annotations:** leave screen recordings, videos, and audio recordings as annotations for greater feedback accuracy and fewer revisions.
 - **Analyze with Precision:** inspect files with color accuracy, densitometry, and print measurements.
 - **Examine Every Detail:** zoom in for pixel-perfect visibility and printable layer inspection.
- Compare Revisions:** highlight differences visually for accurate assessment and decision-making.
- **Collaborate Effectively:** streamline feedback with intuitive annotation tools and real-time commenting.
 - **Versatile Format Support:** review and validate a wide range of file types, including images, PDFs, videos, 3D files, and websites, directly through your web browser.

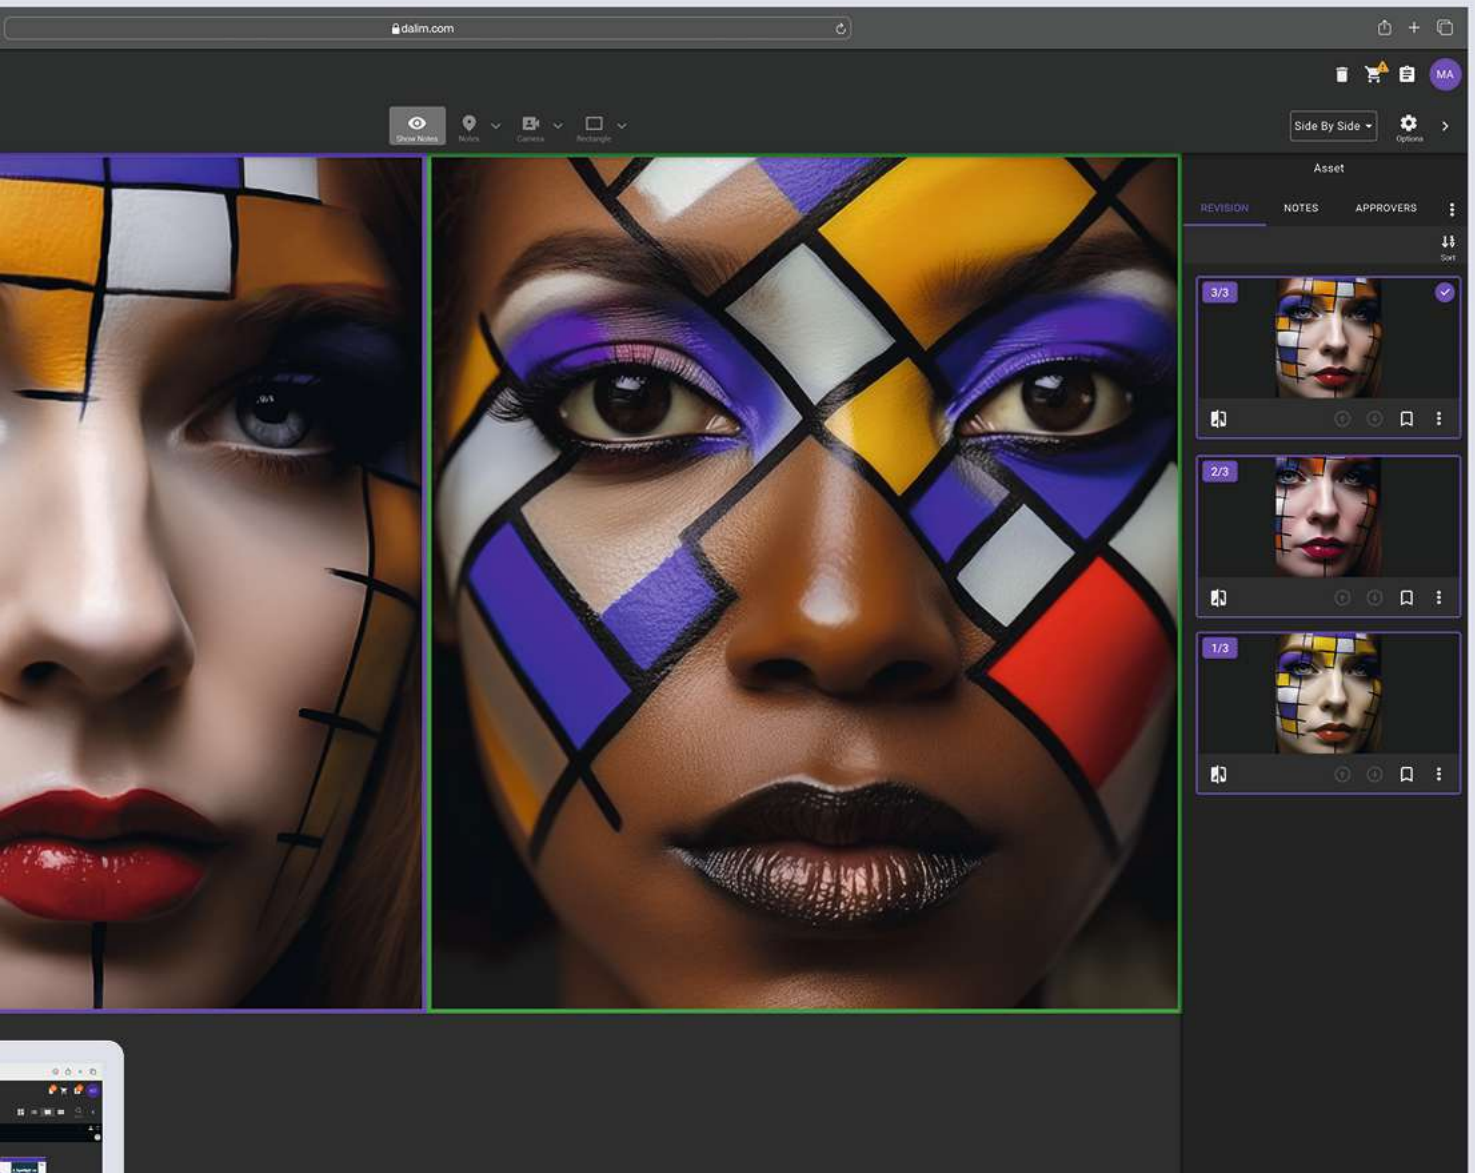

Workflow Automation

- **Automate with Ease:** build simple to complex workflows, eliminating manual tasks and ensuring consistency.
- **Leverage Data Intelligence:** use data, conditions, and scripting for tailored, intelligent automation.
- **Trigger from Anywhere:** initiate workflows from documents, projects, and folders.
- **Customize Functionality:** expand capabilities with powerful scripting for unique requirements.

State of the Art
Online Proofing

Flatplan • featuring sections, regions, and versioning, approval cycle, online validation and much more.

Online Approval Viewer • Review and approve all type of files (images, PDFs, videos, 3D models, websites, and much more) directly from your web browser. Compare up to 16 documents at the same time.

Informed Decision-making

- **Gain Actionable Insights:** access robust reporting features and analytics tools for data-driven decisions.
- **Monitor Key Metrics:** track performance indicators and key metrics to measure success and identify areas for improvement.

Flexibility & Configurability

- **Tailor to Your Needs:** adapt and customize the solution to address your specific challenges and requirements.
- **Extend Functionality:** expand capabilities with powerful scripting and customization options.
- **Build Custom Solutions:** create tailored applications using the low-code application editor.
- **Evolve with Your Business:** adapt the system to meet emerging market challenges and opportunities.

Scalability & Performance

- **Handle Volume with Ease:** scale effortlessly to manage large volumes of content and complex workflows.
- **Grow with Confidence:** rely on a scalable microservices architecture and cloud-native approach for long-term value.
- **Ensure High Availability:** maintain optimal performance and reliability even during peak demand.

"The Workflow first"
DAM Solution

DALIM **ES** is your comprehensive, flexible, and scalable solution for end-to-end content management.

“
...We need to know, for
example, on whose desk a
project is pending approval...”

”

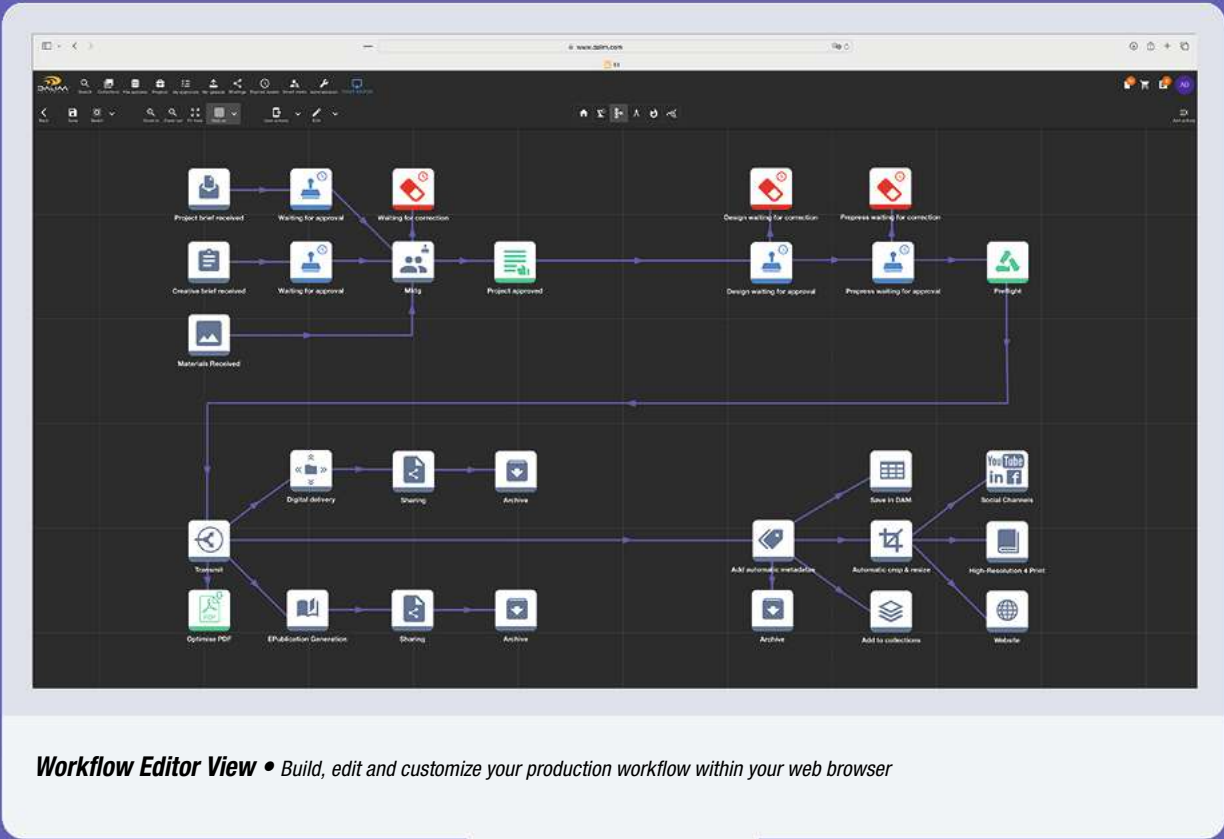

Jorge Mora
Prototyping Manager,
ISDIN Corporate

API-first & Headless Architecture

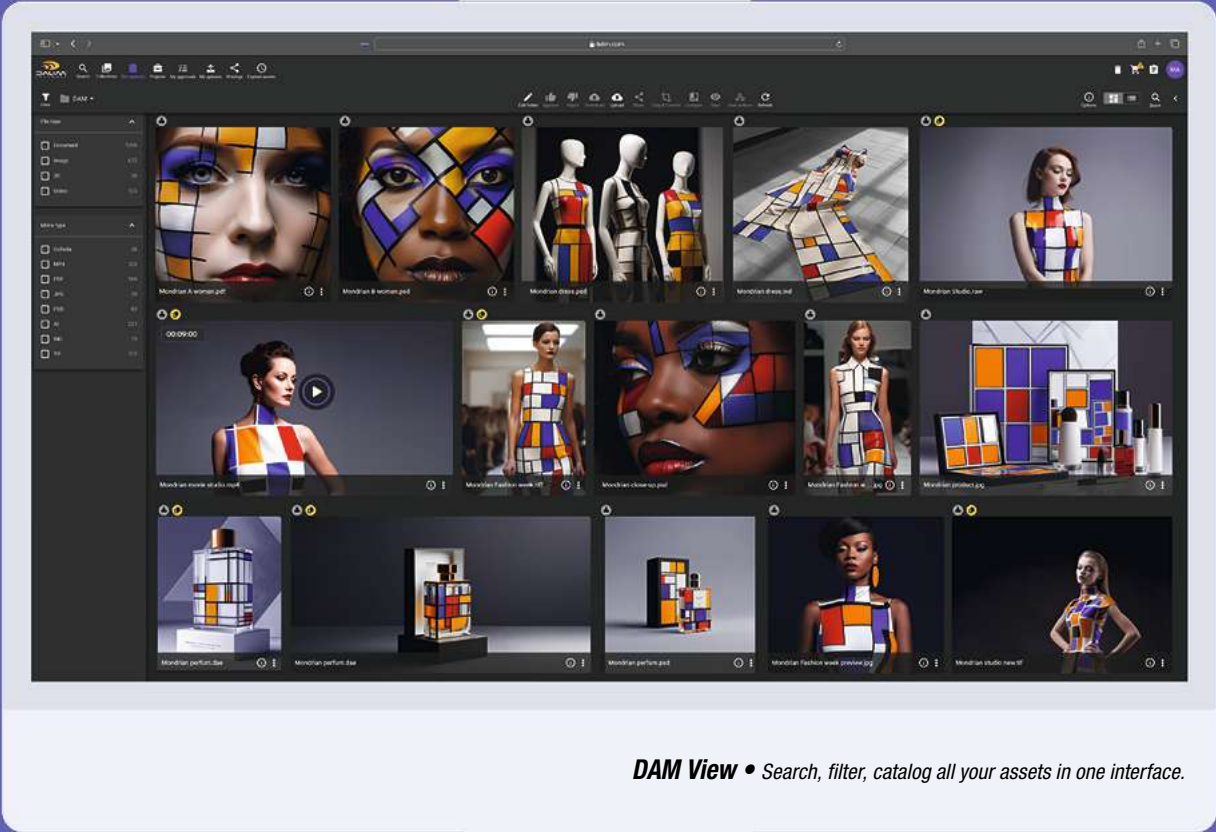

- **Integrate Seamlessly:** leverage our API-first approach for easy integration with existing systems and tools.
- **Adopt Specific Features:** utilize dedicated microservices without the need to adopt the entire product.
- **Ensure Interoperability:** benefit from a headless approach that enables flexibility and compatibility.
- **Future-Proof Your Investment:** adapt to evolving technology landscapes with a future-ready architecture.

Empowering the Content Lifecycle

- **Streamline Processes:** automate tasks, reduce manual effort, and improve overall efficiency.
- **Ensure Brand Consistency:** maintain brand standards and visual appeal across all content.
- **Maximize Asset Value:** extend the utility and longevity of media resources through efficient management and reusability.
- **Simplify Complexity:** centralize content management, streamline workflows, and automate processes across brands and channels.
- **Gain Competitive Advantage:** respond swiftly to market trends and customer demands with flexibility and automation.

Workflow Editor View • Build, edit and customize your production workflow within your web browser

DAM View • Search, filter, catalog all your assets in one interface.

This next-generation software is built on a unique platform embracing our future-proof **MACH** architecture:

- **Micro-services:** for flexibility, and optimized up and down scalability
- **API-first:** enabling seamless integration of any platform component with existing systems
- **Cloud native:** for 24/7 access from anywhere under proven security and smart auto-scaling, without managing a complex IT infrastructure
- **Headless:** for advanced users who can build their own tailored applications and UX/UI

DALIM SOFTWARE is a "made in Germany brand" with over 35 years of experience and a passion for developing software for digital and print content production.
