Discover the Power of DALIM TWIST

Elevate Your Print Production Workflow

- **Flexible Scalability:** Effortlessly adapt to handle volume spikes, and optimize resource allocation during quieter periods for cost-effectiveness and sustainability.
- **Consistent Quality:** Maintain exceptional output quality with 99.999 % consistency and uptime across all job sizes, measured across 100 customers over the last 10 years, ensuring reliable results every time.
- **Centralized Workflow Management:** DALIM TWIST works from a single, centrally managed repository of workflows, ensuring consistency and efficiency across multiple print locations, whether on-premise or in the cloud.
- **Automation Mastery:** Streamline your workflow by eliminating manual tasks and reducing errors with advanced automation features for preflighting, file preparation, imposition, color management, and more.
- **Seamless Integration:** Incorporate DALIM TWIST into your existing ecosystem for a smooth transition and uninterrupted operations.
- **Industry Standards Compliance:** DALIM TWIST is a Ghent Workgroup compliant application, ensuring adherence to industry best practices.

Key Features to Elevate Your Workflow

- **Dynamic Workflow Builder:** Create adaptable workflows that respond to project demands in real-time.
- **Comprehensive Preflighting:** Identify and resolve issues early, minimizing waste and ensuring print-ready files.
- **Universal File Optimization:** Process and optimize diverse file formats for any Digital Front End (DFE), eliminating errors.
- **Advanced File Merging:** Efficiently combine multiple files in various formats, automatically adding essential components and bleed for print-ready output.
- **Color Management Expertise:** Achieve predictable, accurate color across all print and digital mediums.
- **Flexible PDF Interpreter Choice:** Choose between DALIM's own PDF interpreter or Adobe's, allowing for flexibility & scalability independent of licensing constraints.
- **Image Enhancement:** Convert and optimize images for stunning visuals across print and digital mediums.
- **Rapid, Color-Accurate Previews:** Generate high-quality, color-accurate previews of print-ready files faster than ever before, ensuring an uninterrupted customer experience even during peak demand.

Rethinking Data Handling

„Until DALIM DRIVE there was nothing available at this speed. DALIM DRIVE has allowed us to meet our clients' SLAs and provided us with the platform to expand our existing business.“

Alan Darling, Vice President, Information Systems,
The Quantum Group

per second

Real-time
print data
optimization

- **Specialty Technique Preparation:** Generate files with pinpoint accuracy for spot UV, foiling, embossing, and other specialty techniques.
- **Intelligent Imposition:** Handle diverse binding types, folds, and output formats with ease, including support for multi-lane imposition, offering huge potential paper savings.
- **Automated Trapping:** Apply precise trapping techniques for flawless color transitions and optimal print results.

Unlock the Benefits of DALIM TWIST

- **Increased Efficiency:** Automate repetitive tasks and optimize processes end-to-end, saving valuable time and resources.

- **Data-Driven Optimization:** Track key performance metrics to identify bottlenecks and uncover improvement opportunities.
- **Future-Proof Scalability:** Evolve your workflow seamlessly as your business grows and expands.
- **Cost-Effective Growth:** Align resources with real-time needs for optimal cost management.
- **Streamlined Operations:** Standardize processes across multiple sites for consistent quality and efficiency.
- **Reduced Waste:** Minimize errors and reprints through comprehensive preflighting and file optimization.
- **Enhanced Adaptability:** Meet diverse content needs with confidence and flexibility, ensuring customer satisfaction across all projects.

Unleash **the POWER**
of **AUTOMATION,**
Scalability, and
Unwavering
PERFORMANCE

Transform your print production workflow with **DALIM TWIST**. Achieve unparalleled efficiency, adaptability, and output quality across all job sizes, complexities, and print locations. Streamline your processes, optimize resources, and meet demand with ease.

LET'S TALK

Our new software is built on a unique platform embracing what **DALIM SOFTWARE** calls its future-proof **MACH** architecture:

- **Micro-services:** for flexibility, and optimized up and down scalability
- **API-first:** enabling seamless integration of any platform component with existing systems
- **Cloud native:** for 24/7 access from anywhere under proven security and smart auto-scaling, without managing a complex IT infrastructure
- **Headless:** for advanced users who can build their own tailored applications and UX/UI

DALIM SOFTWARE is a “made in Germany brand” with over 35 years of experience and a passion for developing software for digital and print content production.
